EDUCATION

Manipal Institute of Technology

Bachelor of Technology in Computer Science & Engineering; CGPA: 7.94/10.0

Manipal, Karnataka

August 2024 – August 2028

Mount Carmel School

High School (12th Grade); Percentage: 90.4%

New Delhi, India

April 2022 – April 2024

SKILLS

- **Languages:** Java, Python, JavaScript, C++, C
- **CS Fundamentals:** Data Structures & Algorithms, Object-Oriented Design, REST APIs, SQL
- **Databases:** MySQL, PostgreSQL, MongoDB, DocumentDB, CosmosDB
- **AI/ML:** LLMs, RAG, Agent Orchestration, Agentic AI, VoiceAI, TTS, STT
- **Tools:** Git, Docker, AWS, Microsoft Azure

EXPERIENCE

Audacity Club — AI Technology Summer Intern

06/2026 - Current

- Built a merchant onboarding dashboard with AI-driven catalog enrichment, processing over 1200 SKUs across 40 article types
- Built LLM-based catalog enrichment pipeline processing 150 catalog items per week

Formula Manipal — Lead Driverless Engineer

September 2024 – Present

- Currently leading a 25-engineer team building autonomous driving software for a Formula Student vehicle, coordinating perception, planning, and controls sub-teams.
- Placed Top 4 at Formula Student Portugal, 1st in Skidpad, 1st in Acceleration and 2nd in Autocross Events.

Innovative Applications — Winter Intern 2025

November 2025 - January 2026

- Developed agentic AI assistants deployed for 3 ERP clients, automating multi-step task workflows beyond single-turn chatbots.
- Built autonomous data harvesting and validation workflows in N8N, reducing manual data processing time from 9 to 0 per week.

PROJECTS

Karya - An Agentic ERP Platform

[Live Link](#)

- Built an autonomous multi-agent business exception detection and resolution system (Finance, Procurement, Sales, Operations) that reduces manual triage time by ~80%.
- Developed a knowledge-graph-driven full-stack application, equipped with over 50 AI tools, agent memory, and policy-gated autonomy. The technology stack used was Next.js, Fastify, and MongoDB. It was successfully deployed onto Vercel + EC2.

Project Samjhao

[Live Link](#)

- Built Samjhao, the Cursor for education. Samjhao is an Agentic AI platform that makes whiteboard video lessons across 6+ Indian languages in under 90 seconds, using LLMs like GPT-4.1, Gemini and Sarvam TTS in a 2-stage agentic pipeline.
- Single code base for both browser/desktop: the client (React/Svelte+Vercel) is written in both electron/web and rendered via the HTML canvas: this serves an easy to bundle, small Electron app & a React/Svelte in-browser (hosted on Vercel with automated SSL).

AdKar

[Live Link](#)

- AdKar is a VS Code extension which helps developers monetize their devtools. Over 250 people use AdKar daily!
- Publishers on AdKar have earned over 12,000 INR across 23 Million Impressions! Platform allows people to view ads while working and make their share of ad revenue

Self Managed Stock Portfolios

[Github Link](#)

- Designed an LLM-driven portfolio manager using LangChain and RAG, achieving 19% returns over 5.5 months of live and backtested trading across both NSE and BSE.
- A research paper published on this framework was also accepted at the ICMEET 2026 conference to be held in Bali, Indonesia

HONORS AND AWARDS

Microsoft India AI Unlocked Semi Finalists (Top 54)

Awarded \$40,000+ in AI credits through YCombinator Student Grant program

Selected as a Fellow among 14 others, Activate AI Summer 2026

1st place out of 800 teams, MAHE Mobility Challenge 2026 (50,000 prize)

Formula Bharat 2026 Business Plan Presentation Champions

Samsung Prism Web AI Agent Hackathon Finalists : Came Top 5 Out of 430 submissions across India
